- Three events – 15% discount
- Four or more events – 20% discount

COMPANY OVERVIEW

New Energy Events is a rapidly growing event organizer that is sharply focused on the development of world-class renewable projects across Latin America and the Caribbean. Our expanding portfolio of events reflects our belief that the obstacles and opportunities presented by many Latin American and Caribbean markets are often poorly understood by international developers and investors.

Through events, webinars, and the stream of market intelligence we deliver year-round to our stakeholders, we aim to close the knowledge gap and act as a vital bridge between local, renewable resources and international technology and capital. Our events address the key financing, regulatory, and technological issues that senior executives and policy-makers face as they frame a future for alternative energy.

For all of our events, our commitment to bringing key stakeholders to the table - most notably governments, utilities, developers, and financiers - elevates the quality of the dialog and provides our sponsors and delegates with superb opportunities both to get a handle on regional markets and to develop new business streams.

Unlike many event organizers, **New Energy Events** doesn't seek delegates, we seek outcomes. We are motivated by the issues surrounding the implementation of renewables, and sustained by our ability to bring world-class technology, capital, and solutions into the markets in which we are active.

ONLINE EVENT PORTFOLIO

Launched in 2013 the **New Energy Events** webinar series gathers industry leaders for online events which provide our stakeholders with in-depth intelligence on topics and trends which are shaping the markets. Past webinars have focused on key trends such as energy storage, LED lighting, and the impact of global commodity prices on the economics of Caribbean renewables.

ONLINE COMMUNITIES

New Energy Events is committed to building online communities of senior market participants designed to facilitate both the ongoing exchange of information, as well as superb networking opportunities. **New Energy Events** manages three private LinkedIn groups for LAC geothermal professionals, hotel operators managing energy usage, and renewable energy stakeholders in the Caribbean. The CREF LinkedIn Group, a private group for senior market participants, has over 2,000 members. In addition, all our events have dedicated online social networking platforms which enable our delegates to make meetings in advance and maximize the value of their participation in our events.
